

The road to energy efficiency starts with awareness

Know your score!

Schneider Electric introduces the first online tool that offers you a free assessment of energy efficiency across your enterprise.

Novice (Low score between 1 – 1.6)

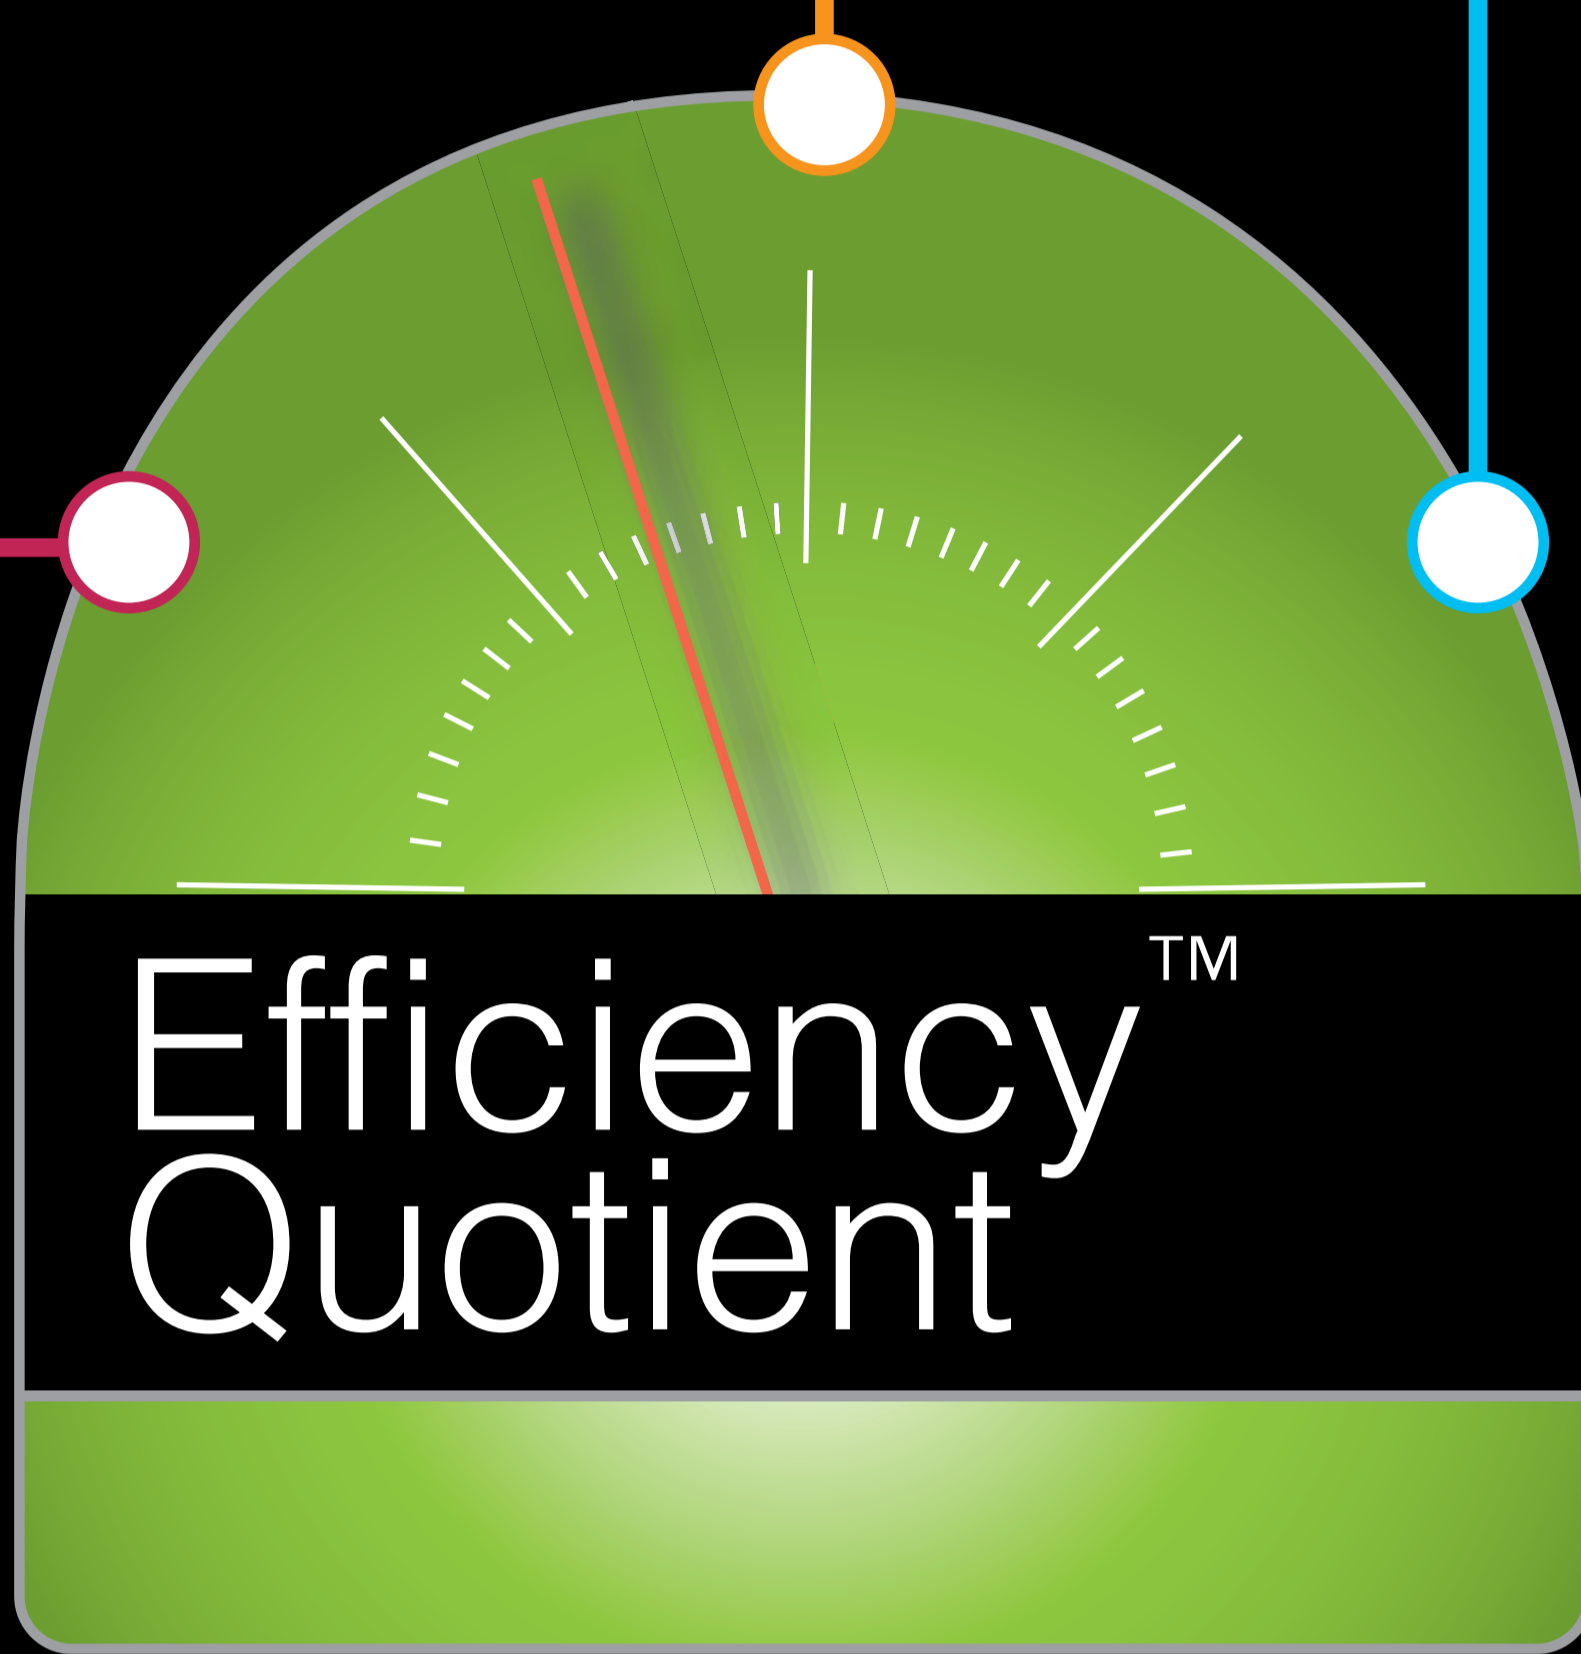

Quick fixes are good, but you have plenty of opportunities for potential energy savings with an ROI of less than four years.

Informed (Average score between 1.7 – 3.3)

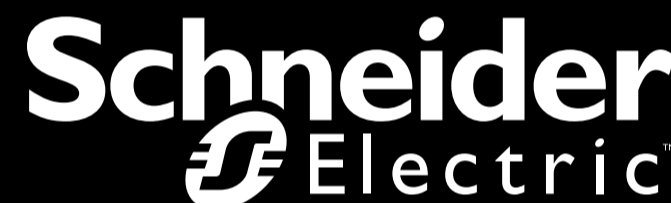

Your enterprise has basic energy-efficiency levels; now, consider a structured process for continuous measurement and improvement.

Savvy (High score between 3.4 – 5)

Your enterprise has a proactive approach, a solid understanding of the current energy consumption, and clearly defined processes for making changes.
